Darryl:

Adam Adams indicated that you came by the site today due to a complaint or odors. We have not started any transfers of the vacuum boxes as of yet but plan to do so soon. We will be going through a water bath and the carbon but I suspect there will still be odors. I have been working closely with Don Richter and keeping him informed of our schedule which has changed due to their rainfall event earlier in the week but we are planning to begin the transfers probably by tomorrow afternoon.

Hopefully, there will not be any complaints.

Are you getting information from Don?

Thanks

Gary Moore
